

Weak Throat—Weak Lungs

Cold after cold; cough after cough! Troubled with this
faking-cold habit? Better break it up. We have great
confidence in Ayer's Cherry Pectoral for this work. No
medicine like it for weak throats and weak lungs. Ask
your doctor for his opinion. He knows all about it.
His approval is valuable. Follow his advice at all times.
No alcohol in this cough medicine. J.C. Ayer Co., Lowell, Mass.

Always keep a good laxative in the house. Take as often as your cold first comes on. What
is the best laxative for this? Ayer's Pills. Ask your doctor his opinion. Let him decide.

BUSTER.

This Great Speed Stallion will make
the season of 1910 from Edinburg, Va.
to Strasburg, Va.
"BUSTER" is the best saddle and
the fastest driving horse in the Val-
ley.
TERMS: Will insure a colt to stand
up and suck for \$15.00. Parting
with mare forfeits insurance.
Will not be responsible for acci-
dents.
For further particulars write to
H. S. BARHAM
Edinburg, Va.
GEO. LITTON, Mgr.,
March 18— Woodstock, Va.

If You Want to Drive, Come Here

I am now running a FIRST CLASS
garage in Woodstock with my hotel
I can furnish you teams you will en-
joy driving. Good horses and nice
equipment. NOTHING CHEAP LOOKING
about any outfit which leaves my
stable. Prices reasonable and good
service.
J. W. HOLTZMAN

Ice Cream

Constantly on hand at the
Excelsior Creamery Wood-
stock, Va.

ALL ICE CREAM AND ICES GUARANTEED PURE.

Leave your orders for
Sunday cream, only, at
Walton & Smoot's Drug
Store. Our ice plant is
now in operation.

Agents for the National Leather
Belting Co.

WOODSTOCK, VIRGINIA.

Plants For Sale.

Cabbage, tomatoes and all kinds of
plants for sale at my residence on
South Main Street.
March 11-47 WALTER M. FRAVEL.

A Long Time Dying.

Mr. Fred Terry told this anecdote
of the death scene in "The Heel of
Achilles":

"One day," he says, "we were re-
hearsing this play, and a member of
my company came in from the street
and asked the call boy how far the re-
hearsal had got.

"Mr. Terry's just dying," replied
the boy.

"Good. I've time to smoke a cigar
before my entrance."

"Presently the actor returned and re-
peated the question.

"Still dying," answered the boy.

"Oh, I'll go and have another cigar
before then."

"Back he came and only got the
same reply from the call boy.

"Finally, after smoking five cigars
retires, he asked, a little breathless,
how far the rehearsal had gone.

"Still dying," answered the call boy.

"Great Scott," gasped the actor. "He
must be immortal!"—London An-
nouncer.

Dr. Hale's Day.

Dr. Hale and the late Bishop Hunt-
ington of New York were fast friends.
The latter had been a Unitarian, and
his shift caused a sensation, says the
Christian Register. The Episcopalians
have saints assigned to the various
days in the year. When an Episco-
palian minister writes a saint he al-
ways writes the name of the saint at
the close of the letter instead of the
date. Bishop Huntington learned all
these things quickly and began to prac-
tice them at once. The first time he
had occasion to write to his old friend
Dr. Hale after joining the church he
placed "St. Michael's day" after his
signature. A reply from the doctor
came, and after his name he had writ-
ten in a full, round hand, "Wash day."

A Little Awkward.

"Near-sightedness must be very em-
barrassing at times," remarked a
Brooklyn resident to an acquaintance
thus afflicted. "The other morning
I saw a man addressed me on a
crowded bridge trolley, and in the
course of conversation he rudely
abused a 'chap' whose political and
business methods he disliked equally.
In fact, he became acutely personal
in his denunciation.

"Before he left the car he was in-
formed by a friend near him that I
was the man he had been abusing. It
didn't worry me at all, but it must
have been a bit disconcerting for him,
don't you think?"—New York Globe.

In Old Bohemia.

"I would like to meet some of the
picturesque long haired knights of the
past and palette," said the unsophis-
ticated stranger. "It is worth a dollar
to meet a real Bohemian."

Epidemics of History.

In the sixteenth century not less than
fifteen epidemics of disease and many
famines carried off the people of Eng-
land. The thirteenth century saw
twenty plagues and epidemics, and
while the fourteenth had a black re-
cord of disease. In 1348 the "black
plague" or "black death," which was
brought into the country from the
east, caused the death of 100,000 per-
sons in London alone, while in Europe
altogether 25,000,000 people fell vic-
tims to its ravages. In 1855 the
"sweating sickness" appeared in Eng-
land, causing great destruction of hu-
man life. It reappeared at various in-
tervals for a century thereafter. The
last terrible visitation of the plague
in England was in 1603-04, by which
100,000 lives were lost in London alone.
This epidemic was followed by the
great fire of 1666, which destroyed 10,
000 houses, including all the most
densely populated portions of the city.
The rebuilding of London with sound
sanitary laws appears to have pre-
vented the pestilence from again de-
vasting that city.

Points on the Market.
Old Gentleman on Broker's Office.
Now, what do you think I might say,
Broker?—You ought to have some Char-
tered. Old Gentleman—Why, I was
only thinking coming up in the train
that I ought to sell some Chartered.
Broker (who wants a commission).
Well, that's not a bad idea, either.
—London Financial Times.

Easily Controlled.

May 13-2nd.

THE "GYROPLANE" NOW

Will Carry 100 Passengers And
Co 100 Miles An Hour.

[From the St. Louis Times.]
The application of the Universal
Aerial Navigation Company for a li-
cense to conduct business in Missouri
has revealed plans for a commercial
passenger airship that rivals the wild-
est dreams of Jules Verne. Officials
of the company declare that within a
year they will have a ship sailing the
skies that will carry up to 100 passen-
gers in a 40-mile wind and at a speed
of 100 miles an hour, if desired.

The machine is the invention of J.
W. Oman, formerly of St. Louis, Mo.,
Texas, but at present a St. Louisian.
One is in progress of construction in
the shops of the inventor for exhibi-
tion at the October aviation meet. The
location of the shops is being closely
guarded.

The inventor claims that his ship
can start either from the land or wa-
ter. He declares it will ascend straight
into the air or can be launched in the
manner of an aeroplane.

The new airship is called a gyro-
plane, so named from the fact that it
is a combination of gyroscopes, the
helicopter and the aeroplane. Its
promoters say it can be built in any
size, from a two-man "runabout" to a
monster of the air that will carry 50
or 100 passengers.

"A 30 or 40 mile breeze would be a
help rather than a hindrance to our
machine," said the inventor to a
Times reporter. "We will maintain
absolute equilibrium in anything short
of a cyclone. The usual obstacles
that prevent the flight of an ordinary
airship will be as nothing to this ma-
chine of ours."

It is planned to construct machines
that will maintain a regular passen-
ger service between cities and States,
and even countries. The gasoline
supply may be unlimited—sufficient to
carry the airship and its passengers
thousands of miles.

The gyroscopes and the helicopter
are familiar principles in heavier than
air navigation, but never before have
they been applied in the manner em-
ployed by Oman. The model of his
ship is fitted with 4 huge propellers,
12 feet in diameter, which may be used
in turn for drawing the machine from
the ground or carrying it through the
air.

The officers of the company say the
machine has been inspected by Govern-
ment engineers and many experts in
machinery and navigation of the air.
They all have pronounced it the great-
est invention of the kind that ever has
been seen, the inventor declares.

Ten patents have been granted by
the Government, covering almost
every feature of the machine. Foreign
patents will be applied for at once.

The machine is to be constructed
entirely of aluminum and macadamia.
There will not be a strip of can-
vas or cloth of any sort about it, ex-
cept that used in the parachutes, fas-
tened to the machine for use in case
of emergency.

The machine, besides carrying four
propellers, is fitted with two engines
both of which will be used to lift the
machine. One of them will be shut
down when the machine is in the air
and carried in case of accident to the
first one.

The propellers are helicopters and while
the machine is rising, and they are
gradually turned from an upright to
a horizontal position to get the ma-
chine under way.

The sole feature of the machine that
resembles an aeroplane is the huge
single plane fastened to the car 10 feet
above its upper edge. This is used for
sailing and for maintaining equilib-
rium. It is also claimed that in case
of accident to the machine it may be
used for bringing it gradually to the ground
by tilting it at different angles.

The inventor asserts the machine can
be made to stand still at one spot in the
air for an indefinite time. "We could
drop 1,000 bombs on a warship from a
height of two miles without moving a
foot," he declared.

The body of the machine, which may
be left open or closed and made wa-
ter-tight, will carry any number of peo-
ple, it is said. The airship will float on the
surface of the water for an indefinite
period; it is claimed, and may reason
from the surface.

The company is incorporated under
the laws of Arizona and is capitalized
at \$5,000,000. F. A. Siefert, a St. Lou-
isian, is president of the company,
which has a board of directors and a
corps of officers composed of St. Louis
business men. Meyer Isaac is secre-
tary and treasurer and the inventor,
J. W. Oman, is general manager.

Oman declares he has studied aerial
navigation 20 years and that he filed
his first plans 12 years ago.

Heavy Rains.

This section of the Valley has been
visited by heavy local rains within
the last week. The streets have been
flooded a number of times. Reports
from the Northern part of the county
are to the effect that they have had
very little rain, and that it is quite
dry in that section.

Cleanliness Arrive.

In describing his arrival at the town
of Cuautla the author of "Mexican
Trails" says: "The first thing to at-
tract my eye was 'Grand Bano,' which
in English means 'grand bath.' Now,
after a day's ride a man craves a
grand bath more than all else, so I
left the horse and entered. A large
placard on the wall bore the follow-
ing: 'A tub of water, 13 cents; with
towel, 18 cents. The person who de-
sires to change the water will pay 10
cents extra.'"

Mrs. E. was in a Richmond hospital.

and she was lately so welcomed the
sight of a very black and very fat
giant maid who came in one morning
to wipe up the floor. Some one new
to talk to, so no time was lost.

"I have not seen you working around
here before. Aren't you a new girl?"
Edna's friend's friend let the cloth slip
back into the bucket and sat flat upon
the floor before answering.

"Yes, I'm new. I've just washed up
do floor. But I don't work. I'm eld-
kated."

"And where were you educated?"
was the next question.

"In a seminary." Then, with a burst
of confidence: "There was me and an-
other girl workin' in a house. She was
cook, and I was chambermaid, and we
had great times about who would get
the prize, but I lost."

"Then, she was easy to beat, 'cause
she got smothered to death with gas
de night before de 'xaminations com-
off.'"—Cleveland Leader.

A Pair of Poets.

Hearing a noise in the street before
his house one morning, Robert Brown-
ing, the poet, went to his window and
saw a great crowd gazing at some
Chinamen in gorgeous costumes who
were just leaving their carriages to
mount his steps. Presently they were
announced as the Chinese minister at
the court of St. James and his suite.

A solemn presentation having taken
place, Browning said to the interpreter:
"May I ask to what I am indebted for
the honor of his excellency's visit?"

The interpreter replied, "His excel-
lency is a poet like your country."
Then upon the two poets shook hands
heartily. Browning then said, "May I
ask to what branch of poetry his excel-
lency devotes himself?" To which
the interpreter answered, "His excel-
lency devotes himself to poetical enig-
mas." At this Browning, recognizing
fully the comic element in the situa-
tion, extended his hand most cordially,
saying: "His excellency is thrice wel-
come. He is a brother in grovels."

When the Sun Grows Cold.

Dr. Fredrich Nansen predicts the fate
of the earth in the far distant future,
when the sun grows cold. The sim-
ple, low organisms, he says, will prob-
ably live longest, until even they dis-
appear. Finally, he says, all water on
the earth's surface will freeze and the
oceans will be transformed into ice to
the bottom. Some time later the car-
bonic acid of the atmosphere will be-
gin to fall on the surface of the earth
in the form of snow. Some time after
that the temperature on the surface
will have reached about 330 degrees
below zero F. New oceans will then
be formed by the atmosphere being
turned into liquid, and the atmosphere
of that future earth will be only hy-
drogen and helium. The sun will go
through the same process. It will con-
tinue in its way as a dark star through
space, accompanied by the planets.

Hard on the Chairs.

Among the ancestors of Wendell
Phillips were several Puritan clergy-
men. Perhaps it was a push of heredi-
tary which made him at five years of
age a preacher.

His congregation was composed of
circles of chairs arranged in his fa-
ther's parlor, while a taller chair, with
a Bible on it, served him for a pulpit.
He would arrange these wooden audi-
tors by the hour.

"Wendell," said his father to him
one day, "don't you get tired of this?"
"No, papa," wittily replied the boy
preacher, "I don't get tired, but it is
rather hard on the chairs."

His Own People.

The negro hotel wherever it is, Ameri-
can Magazine, supplies an element of
light heartedness which will not be
wholly crushed. In illustration he tells
this story of a very light nautlo of
Tennessee:

A number of years ago it came to
him suddenly one day that he was
white enough to pass anywhere for
white, and he acted instinctively on
his inspiration.

He bought a first class ticket on a Missis-
sippi river boat to Cincinnati. No one
suspected that he was colored. He sat
at the table with white people and a
white man. At first, he said, he could
hardly restrain his exultation, but after a
while, although he associated with the
white men, he began to be homesome.

"It grew colder and colder," he said.
In the evening he sat on the upper
deck, and as he looked over the railing
he could see down below the negro
passengers and deck hands talking and
laughing. After a time when it grew
darker they began to sing the inimitable
negro songs.

"That finished me," he said. "I got
up and went downstairs and took my
place among them. I've been a negro
ever since."

The First Language.

No one of the existing languages has
any legitimate claim to be considered
the original of the family of languages.
standing to the others as Latin and
French, stands to Italian and French.
Of an original primitive language of
manhood the most patient research
has found no trace. All of them—Ar-
abian, Persianian, Hebrew, Arme-
nian, Phoenician, Sanskrit, Latin, Gre-
ek, and all other languages, which have
ever been spoken, have their origin in
our common ancestor, the first man
who spoke.

"That finished me," he said. "I got
up and went downstairs and took my
place among them. I've been a negro
ever since."

Women in Sweden.

It is to the honor of Sweden that
the fact of a woman working for her
living in no way lowers her social
position. Many professional ladies are
the daughters of court officials and are
received and welcomed in the court
circle.—London Quen.

A Gentleman of Leisure.

Coding—Why did you speak to that
old tramp, dear boy? Softy—Why
shouldn't I, old chap? He isn't in
twade, and he doesn't work for a liv-
ing.—Exchange.

Prompt Rebuke.

"Orlando, you mustn't put your arm
around my waist."

"Why, Gloriana, it's been there for
thirty years."

"Well, I didn't notice it till just
now."—Chicago Tribune.
